## WORK EXPERIENCE

---

### Web Developer

Feb. 2022 - Present

Sheertex | Montreal, QC

- Developed and maintained multiple Shopify Hydrogen websites using React, ensuring high availability and optimal performance
- Developed and launched a website “Quick Add” feature using React and Shopify’s Storefront API, resulting in a 10% increase in revenue
- Increased website conversion rate by 15% by implementing A/B tests and analyzing user behavior using tools such as VWO and Hotjar
- Conducted regular code reviews and provided constructive feedback to team members, resulting in improved code quality and a 30% reduction in the number of bugs and issues reported by users.

### Web Developer

Jan. 2021 - Feb. 2022

Manhattan International Inc | Montreal, QC

- Contributed to the development of customized Shopify themes using HTML, CSS, Shopify Liquid, and JavaScript, resulting in a more engaging and user-friendly customer experience.
- Developed and launched a mini cart “Upsell” feature using Javascript and Shopify’s API, resulting in a 15% increase in revenue
- Assisted with the implementation of various third-party integrations and APIs, such as payment gateways and shipping providers, to streamline the e-commerce process and reduce checkout friction.

## PROJECT EXPERIENCE

---

### Pokedex

#### Visit Page

A web application that allows users to look up detailed information about their favorite Pokemon. This project was built using ReactJS and MaterialUI. I built this project in order to help quickly search for information about Pokemon when needed

#### What I’ve learned:

- Gained experience working with REST APIs, specifically how to fetch and handle data from the PokeAPI, and how to use third-party libraries such as Axios to simplify the process.
- Developed a strong understanding of MaterialUI, including how to use various components, themes, and layouts to create a consistent and visually appealing design.

### Movie Search

#### Visit Page

A website to look up any movie you want and get a short plot description along with a trailer of the movie

#### What I’ve learned:

- Gained experience working with the MovieDB API, including how to fetch and handle data from the API, and how to use query parameters to search for specific movies
- Gained experience with third-party libraries such as Axios and React Router, including how to use Axios for HTTP requests and how to use React Router to create a multi-page application with client-side routing.

## SKILLS & LANGUAGES

---

**Skills:** HTML | CSS | JavaScript | Sass | TailwindCSS | Bootstrap | React | NextJS | MaterialUI | Styled Components | Shopify Liquid | GraphQL | REST API | Git

**Languages:** English (*native*) | French (*fluent*)
