WORK EXPERIENCE

Web Developer

Feb. 2021 - Present

Manhattan International Trade Inc | Montreal, QC

- Developed and implemented upsell feature that increased monthly revenue by 10%
- Implemented version control and CD pipeline in the development workflow
- Increased monthly conversion rate by 30% by optimizing website speed
- Developed frontend solutions that increased monthly revenue

PROJECT EXPERIENCE

PokeDex

A web application that allows users to look up detailed information about their favorite Pokemon. This project was built using React and MaterialUI. Built this project in order to help quickly search information about Pokemon when needed

[Visit Page](#)

What I've learned:

- Getting more familiar with using a React UI framework such as Material UI
- Implementing infinite scrolling using a React library
- Utilizing React Hooks for the first time

Designo

A multi-page website about a fictional design company built using React and Sass. This was a great project to sharpen my Sass skills and organize my stylesheets better. This project also allowed me to become more comfortable with using SVGs in my projects

[Visit Page](#)

What I've learned:

- Building a multi-page React website using SASS from scratch
- Getting more familiar with the use of SVGs

Movie Search

A website to look up any movie you want and get a short plot description along with a trailer of the movie
