📍 Montreal, QC

SUMMARY

From a young age, I've always been into technology. From tinkering with our PC in the living room, or watching every single Apple WWDC keynote to even building video games using unity at age 12. Now being a Web Developer, I am always looking for opportunities to challenge myself and grow. To the best of my abilities, I have the goal to improve people's lives with technology . Below you'll find projects I've completed that showcase my skills and general background in developing software.

EXPERIENCE

Designo

🔗 https://designo-d9d71e.netlify.app/

A multi-page website about a fictional design company built using React and Sass. This was a great project to sharpen my Sass skills and organize my styles sheets better. This project also allowed me to become more comfortable with using SVGs in my projects

- Built from scratch using React and Sass
- Fully responsive with the use of Flexbox and CSS grid

Pokedex

🔗 https://pokemon-pokedex-4ah7.netlify.app/

A web application that allows users to look up detailed information about their favorite Pokemon. The Pokemon are also sorted by their respective types

- Consumes data from the PokeAPI and displays it in a visually appealing UI
- Utilizes React Hooks in order to make the state more manageable and to make the overall code cleaner
- Implemented an Infinite Scroll feature using a React library

Movie Search

🔗 https://movie-search-464185.netlify.app/

A website to look up any movie you want and get a short plot description along with a trailer of the movie

- Consumes data from the IMDb API and displays it in a visually appealing UI
- Utilizes Axios in order to fetch data from the API which allows users to search movies
- Integrates the use of the React YouTube library in order for users to watch movie trailers

PASSIONS

Photography

I started photography as a way to express myself artistically. I consider it to be my creative outlet when I need a break from programming.

Video Games

my love for video games started when I was 6 playing my dads PlayStation 1 and now it's evolved into building gaming PCs for my friends and I.

SKILLS & TECH

Languages

JavaScript   HTML5   CSS3

Tools and Libraries

ReactJS   NextJS   Bootstrap   Git

jQuery   Sass   TailwindCSS

MaterialUI   Styled Components
