EXPERIENCE

Web Developer - (React - Shopify Storefront API)   **Feb. 2022 - Present**

Sheertex | Montreal, QC

- Developed and maintained multiple Shopify Hydrogen websites using React, ensuring high availability and optimal performance
- Implemented and launched a website "Quick Add" feature using React and Shopify's Storefront API, resulting in a 10% increase in revenue
- Improved website conversion rate by 15% by conducting A/B tests and analyzing user behavior using tools such as VWO and Hotjar
- Conducted regular code reviews and provided constructive feedback to team members, resulting in improved code quality and a 30% reduction in the number of reported bugs and issues

Web Developer - (Javascript - Shopify Liquid)   **Jan. 2021 - Feb. 2022**

Manhattan International Inc | Montreal, QC

- Contributed to the development of customized Shopify themes using HTML, CSS, Shopify Liquid, and JavaScript, resulting in a more engaging and user-friendly customer experience
- Developed and launched a mini cart "Upsell" feature using Javascript and Shopify's API, resulting in a 15% increase in revenue
- Assisted with the implementation of various third-party integrations and APIs, such as payment gateways and shipping providers, to streamline the e-commerce process and reduce checkout friction

PROJECTS

Pokedex

Visit Page

- A web application that allows users to look up detailed information about their favorite Pokemon using ReactJS and MaterialUI, resulting in a user-friendly interface and quick access to information

Movie Search

Visit Page

- A website to look up any movie and get a short plot description along with a trailer, using React and external REST APIs, resulting in an intuitive and engaging user experience
